Computer Technical Requirements for Live Remote Proctoring (LRP)

CMCI utilizes PSI Bridge for LRP. In order to take the Certified Construction Manager® (CCM®) exam through PSI Bridge, CMCI recommends using a personal computer that meets the requirements below.

PSI Bridge is compatible with any modern Windows or Mac OS X computers with a working webcam, microphone, and internet connection. PSI's compatibility check tool will ensure the candidate's system meets the following technical requirements (hardware and software) for their remote proctored exam:

- **Operating system supported**: Windows 7 and later; 32bit (x86) and 64bit (x64); Mac OS X and later.
- **Browsers supported**: PSI Secure Lock-Down Browser - To be downloaded within 30 minutes of test being delivered.
- **Browser settings**: The browser must accept third-party cookies for the duration of the exam ONLY.
- **Webcam/microphone**: Minimum VGA 640 x 480 resolution, enabled built-in or external microphone.
- **Bandwidth**: Minimum 400 kb/s download and upload.
- **Hardware requirements**: 2GB RAM Memory; 1 GB Free Disk Space, minimum 1368x768 screen resolution.

If your personal computer does not meet the requirements outlined above, CMCI highly recommends scheduling your CCM exam at a PSI Testing Center.

If you have questions regarding your computer's compatibility or a PSI Testing Center, please contact PSI directly. All other questions regarding the CCM exam should be directed to CMCI.
