Description

Start your future with a new mission: Northrop Grumman Space Systems (NGSP). As a part of the NGSP Team, you will work with experts that develop systems and solutions to keep our world safe. Together we protect our troops, public safety, information, and our planet. It's unique work. It's challenging and rewarding. But most of all, it's work that makes a difference. Our culture thrives on intellectual curiosity, cognitive diversity and bringing your whole self to work, and we have an insatiable drive to do what others think is impossible. Our employees are not only part of history, they're making history. Join us and launch your career.

The GBSD program has exciting opportunities for a Staff Civil Engineer based in Roy, Utah to develop engineering concepts for both design and construction to include, but not limited to, grading, storm water management, utilities, roadways, parking lots, construction materials and basic structures. Review and comment on construction drawings, specifications, Requests for Information (RFI), shop drawings and submittals, concrete mix designs, logistics support, construction scheduling, safety programs, NEPA, and contractor claims. Prepare material quantities, cost estimates, construction schedules and permit applications. Identifies measures for cost control, cost reduction, schedule, and production.

As a full-time employee of Northrop Grumman Space Systems, you are eligible for our robust benefits package including:

- Medical, Dental & Vision coverage
- 401k
- Educational Assistance
- Life Insurance
- Employee Assistance Programs & Work/Life Solutions
- Paid Time Off
- Health & Wellness Resources
- Employee Discounts

This position's standard work schedule is a 9/80. The 9/80 schedule allows employees who work a nine-hour day Monday through Thursday to take every other Friday off.

GBSDJobs

Qualifications

Basic qualifications:

- BS in Civil Engineering with 14 years of experience in DoD or other government agency construction contracts
 - 10 years of experience leading the performance of tasks on schedule, at cost and achieving all requirements as either project lead, integrated program team or cost account manager
 - The ability to initiate, develop, integrate, execute, direct and control program plans and cost and schedule baselines that meet both program contractual requirements and stakeholder expectations.
 - The ability to identify, select, direct and manage subcontract and supply chain elements of the program in a manner that supports program goals and company strategy.
- Ability to obtain and maintain security clearance.

Preferred qualifications:

- Intercontinental Ballistic Missile (ICBM) programs or projects, or Master's and 10 years' experience supporting U.S. Government ICBM programs and projects
- Thorough knowledge of ICBM Missile Wing security processes for Launch Facilities, Missile Alert Facilities as well as other Air Force installations
- DoD Secret or Interim Top Secret Clearance required to start
- Professional Engineer Registration (PE), Project Management Professional (PMP) or Certified Construction Manager (CCM)

- % travel: 25%
- Personality traits: Works well with teams
- Work environment: Typical office environment, most likely working in cubicle with multiple others doing similar tasks. Occasional field work on construction sites with requirements to work in a dusty and noisy environment wearing personal protective equipment such as hard hat, boots, safety vest, gloves and protective eyewear.
