ABOUT CMAA

CMAA VISION

CMAA is the voice of the program and construction management industry and the premier resource for professionals working in the built environment.

CMAA MISSION

To promote, support, educate, and develop professionals who lead the delivery of programs and projects within the built environment.

The Construction Management Association of America is an industry association dedicated to the practice of professional construction management.

CMAA represents more than 25,000 members including federal/state/local government and private sector owners, construction consultants, technology suppliers, academia, and legal organizations all with a common goal: to improve our nation's infrastructure.

CMAA was formed in 1982 to establish standards for managing construction projects. Construction management is rooted in traditional project management practices and also requires a unique body of skills and professional knowledge to perform successfully. CMAA is delivery method neutral; seeking to ensure that all professionals are prepared to succeed regardless of the scope, scale, or complexity of any project or program.

Today, CMAA has more than 25,000 members including individual professionals, professional service companies, and construction owners in the public and private sectors, as well as academic and associate members. CMAA has 33 chapters across the country.
